Number 1. September

ARTICLES

1 **Regulation of 5-Aminolevulinic Acid Synthesis in Developing Chloroplasts. IV. An Endogenous Inhibitor from the Thylakoid Membranes**—Paul A. Castelfranco* and Xinghua Zeng

7 **Stress Responses in Alfalfa (*Medicago sativa* L.). X. Molecular Cloning and Expression of *S*-Adenosyl-L-Methionine:Caffeic Acid 3-*O*-Methyltransferase, a Key Enzyme of Lignin Biosynthesis**—Ganesan Gowri, Robert C. Bugos, Wilbur H. Campbell, Carl A. Maxwell, and Richard A. Dixon*

15 **Two Kunitz-Type Proteinase Inhibitors from Potato Tubers**—Terence A. Walsh* and Wayne P. Twitchell

19 **Elicitor-Induced Ethylene Biosynthesis in Tomato Cells. Characterization and Use as a Bioassay for Elicitor Action**—Georg Felix, Debora G. Grosskopf, Martin Regenass, Christoph W. Basse, and Thomas Boller*

26 **Metabolism of Gibberellin A_{12} and A_{12}-Aldehyde in Developing Seeds of *Pisum sativum* L.**—Yu-xian Zhu, Peter J. Davies*, and Anna Halinska

34 **Superoxide Dismutase in the Symbiont *Anabaena azollae* Strasb.**—A. Canini, F. Galiazzo, G. Rotilio, and M. Grilli Caiola*

41 **Relationships between the Efficiencies of Photosystems I and II and Stromal Redox State in CO_2-Free Air. Evidence for Cyclic Electron Flow *in Vivo***—Jeremy Harbinson and Christine H. Foyer*

50 **SO_2 Effect on Photosynthetic Activities of Intact Sugar Maple Leaves as Detected by Photoacoustic Spectroscopy**—Konka Veeranjaneyulu, Christophe N. N'soukpoé-Kossi, and Roger M. Leblanc*

55 **Circadian Rhythm in Amino Acid Uptake by *Synechococcus* RF-1**—Tsung-Hsien Chen*, Tzy-Li Chen, Liang-Ming Hung, and Tan-Chi Huang

60 **Modulation of Auxin-Binding Proteins in Cell Suspensions. I. Differential Responses of Carrot Embryo Cultures**—Fiorella LoSchiavo, Francesco Filippini, Fabrizio Cozzani, Daniela Vallone, and Mario Terzi*

65 **Triacylglycerol Bioassembly in Microspore-Derived Embryos of *Brassica napus* L. cv Reston**—David C. Taylor*, Nikolaus Weber, Dennis L. Barton, Edward W. Underhill, Lawrence R. Hogge, Randall J. Weselake, and M. Keith Pomeroy

80 **Molecular Cloning of Tomato Pectin Methylesterase Gene and its Expression in Rutgers, Ripening Inhibitor, Nonripening, and Never Ripe Tomato Fruits**—Robert W. Harriman, Denise M. Tieman, and Avtar K. Handa*

88 **Metabolic Bases for Differences in Sensitivity of Two Pea Cultivars to Sulfur Dioxide**—Nageswara R. Madamanchi and Ruth G. Alscher*

94 **A Lipoxygenase Pathway Is Activated in Rice after Infection with the Rice Blast Fungus *Magnaporthe grisea***—Hiroyuki Ohta*, Kan Shida, You-Liang Peng, Iwao Furusawa, Jiko Shishiyama, Shigeo Aibara, and Yuhei Morita

99 **Oxidation of External NAD(P)H by Purified Mitochondria from Fresh and Aged Red Beetroots (*Beta vulgaris* L.)**—Kenneth M. Fredlund*, Allan G. Rasmusson, and Ian M. Møller

104 **Plant NAD(H)-Glutamate Dehydrogenase Consists of Two Subunit Polypeptides and Their Participation in the Seven Isoenzymes Occurs in an Ordered Ratio**--Konstantinos A. Loulakakis and Kalliopi A. Roubelakis-Angelakis*

112 **Growth and Photosynthetic Characteristics of *Solanum tuberosum* Plantlets Cultivated *in Vitro* in Different Conditions of Aeration, Sucrose Supply, and CO_2 Enrichment**—Laurent Cournac*, Bernard Dimon, Patrick Carrier, Aimée Lohou, and Pierre Chagvardieff

118 **Action Spectrum for the Light-Dependent Step in Gametic Differentiation of *Chlamydomonas reinhardtii***—Helge Weissig and Christoph F. Beck*

122 **Ethylene Production and 1-Aminocyclopropane-1-Carboxylic Acid Conjugation in Thermoinhibited *Cicer arietinum* L. Seeds**—Mercedes Gallardo, María del Mar Delgado, Isabel María Sánchez-Calle, and Angel Jesús Matilla*

128 **Cysteine, γ-Glutamylcysteine, and Glutathione Levels in Maize Seedlings. Distribution and Translocation in Normal and Cadmium-Exposed Plants**—Wilfried E. Rauser*, Robert Schupp, and Heinz Rennenberg

139 **Acid Phosphatase-1 from Nematode Resistant Tomato. Isolation and Characterization of its Gene**—Valerie M. Williamson* and Greggory Colwell

147 **Light Intensity-Induced Changes in *cab* mRNA and Light Harvesting Complex II Apoprotein Levels in the Unicellular Chlorophyte *Dunaliella tertiolecta***—Julie LaRoche*, Anne Mortain-Bertrand, and Paul G. Falkowski

154 **Influence of Water Deficit on Maize Endosperm Development. Enzyme Activities and RNA Transcripts of Starch and Zein Synthesis, Abscisic Acid, and Cell Division**—Eric S. Ober, Tim L. Setter*, James T. Madison, John F. Thompson, and Paul S. Shapiro

165 **Relevance of Amadori and Maillard Products to Seed Deterioration**—Scott H. Wettlaufer and A. Carl Leopold*

170 **Delayed Onset of Isoprene Emission in Developing**

* Author to whom correspondence should be addressed.

Velvet Bean (*Mucuna* sp.) Leaves—Jennifer Grinspoon, William D. Bowman, and Ray Fall*

175 Microtubules in Mesophyll Cells of Nonacclimated and Cold-Acclimated Spinach. Visualization and Responses to Freezing, Low Temperature, and Dehydration—Michael E. Bartolo and John V. Carter*

182 Effect of Microtubule Stabilization on the Freezing Tolerance of Mesophyll Cells of Spinach—Michael E. Bartolo and John V. Carter*

188 Influence of Water and Temperature Stress on the Temperature Dependence of the Reappearance of Variable Fluorescence following Illumination—David L. Ferguson and John J. Burke*

193 Electrical Potentials during Gravitropism in Bean Epicotyls—Kazuyuki Imagawa, Kiyoshi Toko*, Shu Ezaki, Kenshi Hayashi, and Kaoru Yamafuji

197 Effect of Diphenyl Ether Herbicides on Oxidation of Protoporphyrinogen to Protoporphyrin in Organellar and Plasma Membrane Enriched Fractions of Barley—Judith M. Jacobs, Nicholas J. Jacobs*, Timothy D. Sherman, and Stephen O. Duke

204 Characterization and Comparison of Arcelin Seed Protein Variants from Common Bean—Lynn M. Hartweck, Robert D. Vogelzang, and Thomas C. Osborn*

212 Single *rol* Genes from the *Agrobacterium rhizogenes* T_L-DNA Alter Some of the Cellular Responses to Auxin in *Nicotiana tabacum*—Christophe Maurel*, Hélène Barbier-Brygoo, Angelo Spena, Jacques Tempé, and Jean Guern

217 Biochemical Genetics of Plant Secondary Metabolites in *Arabidopsis thaliana*. The Glucosinolates—George W. Haughn*, Laurence Davin, Michael Giblin, and Edward W. Underhill

227 Amino Acid and Sucrose Content Determined in the Cytosolic, Chloroplastic, and Vacuolar Compartments and in the Phloem Sap of Spinach Leaves—Burgi Riens, Gertrud Lohaus, Dieter Heineke, and Hans Walter Heldt*

234 Cell Surface Interactions between Bean Leaf Cells and *Colletotrichum lindemuthianum*. Cytochemical Aspects of Pectin Breakdown and Fungal Endopolygalacturonase Accumulation—Nicole Benhamou*, Claude Lafitte, Jean-Paul Barthe, and Marie-Thérèse Esquerré-Tugayé

245 Response of Soybean Photosynthesis and Chloroplast Membrane Function to Canopy Development and Mutual Shading—Kent O. Burkey* and Randy Wells

253 Regulation of Sulfate Assimilation by Light and *O*-Acetyl-L-Serine in *Lemna minor* L.—Urs Neuenschwander, Marianne Suter, and Christian Brunold*

259 Spatial Distribution of Flavonoid Conjugates in Relation to Glucosyltransferase and Sulfotransferase Activities in *Flaveria bidentis*—Abdelali Hannoufa, Luc Varin, and Ragai K. Ibrahim*

264 Characterization of Tonoplast Polypeptides Isolated from Corn Seedling Roots—Min Ni and Leonard Beevers*

273 Diffusion and Electric Mobility of Ions within Isolated Cuticles of *Citrus aurantium*. Steady-State and Equilibrium Values—Melvin T. Tyree*, Charles R. Wescott, and Christopher A. Tabor

280 Physiological Basis for Differential Sensitivities of Plant Species to Protoporphyrinogen Oxidase-Inhibiting Herbicides—Timothy D. Sherman, José M. Becerril, Hiroshi Matsumoto, Mary V. Duke, Judith M. Jacobs, Nicholas J. Jacobs, and Stephen O. Duke*

288 Activity and Accumulation of Cell Division-Promoting Phenolics in Tobacco Tissue Cultures—Rita A. Teutonico, Matthew W. Dudley, John D. Orr, David G. Lynn, and Andrew N. Binns*

298 Effects of Mild Water Stress and Diurnal Changes in Temperature and Humidity on the Stable Oxygen and Hydrogen Isotopic Composition of Leaf Water in *Cornus stolonifera* L.—Lawrence B. Flanagan* and James R. Ehleringer

306 Phytochelatin Accumulation and Cadmium Tolerance in Selected Tomato Cell Lines—Subhash C. Gupta and Peter B. Goldsbrough*

313 Influence of Ozone on the Stable Carbon Isotope Composition, $\delta^{13}C$, of Leaves and Grain of Spring Wheat (*Triticum aestivum* L.)—Matthias Saurer, Jürg Fuhrer*, and Ulrich Siegenthaler

317 Cloning and Sequencing of the cDNA Encoding the Rubber Elongation Factor of *Hevea brasiliensis*—Elisabeth Goyvaerts*, Mark Dennis, David Light, and Nam-Hai Chua

322 Enzymes of Nitrogen Assimilation Undergo Seasonal Fluctuations in the Roots of the Persistent Weedy Perennial *Cichorium intybus*—Konrad A. Sechley*, Ann Oaks, and J. Derek Bewley

330 Photoacoustic Study of Changes in the Energy Storage of Photosystems I and II during State 1-State 2 Transitions—Konka Veeranjaneyulu, Marc Charland, Denis Charlebois, and Roger M. Leblanc*

335 Regulation of Light-Induced Chloroplast Transcription and Translation in Eight-Day-Old Dark-Grown Barley Seedlings—Robert R. Klein

343 Dihydroflavonol Reductase Activity in Relation to Differential Anthocyanin Accumulation in Juvenile and Mature Phase *Hedera helix* L.—John R. Murray and Wesley P. Hackett*

352 Red Light-Regulated Growth. I. Changes in the Abundance of Indoleacetic Acid and a 22-Kilodalton Auxin-Binding Protein in the Maize Mesocotyl—Alan M. Jones*, Deborah S. Cochran, Patrick M. Lamerson, Michael L. Evans, and Jerry D. Cohen

359 Morphological Responses of Wheat to Changes in Phytochrome Photoequilibrium—Charles Barnes* and Bruce Bugbee

366 Germin-Like Polypeptides Increase in Barley Roots during Salt Stress—William J. Hurkman*, H. Peggy Tao, and Charlene K. Tanaka

375 **Plastid Import and Iron-Sulfur Cluster Assembly of Photosynthetic and Nonphotosynthetic Ferredoxin Isoproteins in Maize**—Shoichi Suzuki, Keiji Izumihara, and Toshiharu Hase*

381 **Thylakoid Organization in the Chromophyte Alga *Ochromonas danica*. Isolation and Characterization of a New Pigment-Protein Complex**—Pamela B. Gibbs* and John Biggins

388 ***In Vivo* and *in Vitro* Protein Phosphorylation Studies on *Ochromonas danica*, an Alga with a Chlorophyll *a*/*c*/Fucoxanthin Binding Protein**—Pamela B. Gibbs and John Biggins

396 **Partial Purification, Photoaffinity Labeling, and Properties of Mung Bean UDP-Glucose:Dolicholphosphate Glucosyltransferase**—Richard R. Drake, Jr., Gur P. Kaushal, Irena Pastuszak, and Alan D. Elbein*

402 ***In Vitro* Flower Bud Formation in Tobacco: Interaction of Hormones**—Anton J. M. Peeters, Will Gerards, Gerard W. M. Barendse*, and George J. Wullems

409 **Characterization of the Arrest in Anther Development Associated with Gibberellin Deficiency of the *gib-1* Mutant of Tomato**—Steven E. Jacobsen and Neil E. Olszewski*

415 **Biochemical Correlates of the Circadian Rhythm in Photosynthesis in *Phaseolus vulgaris***—Arthur L. Fredeen, Timothy L. Hennessey, and Christopher B. Field*

420 **Changes in Photorespiratory Enzyme Activity in Response to Limiting CO_2 in *Chlamydomonas reinhardtii***—Laura Fredrick Marek* and Martin H. Spalding

426 **Temperature-Dependent Water and Ion Transport Properties of Barley and Sorghum Roots. I. Relationship to Leaf Growth**—Hormoz BassiriRad, John W. Radin*, and Kaoru Matsuda

433 **Regulation of a Chitinase Gene Promoter by Ethylene and Elicitors in Bean Protoplasts**—Dominique Roby, Karen Broglie, John Gaynor, and Richard Broglie*

440 **Carbon Transfer and Partitioning between Vegetative and Reproductive Organs in *Pisum sativum* L.**—Marie-Hélène Jeuffroy* and Fernand R. Warembourg

COMMUNICATIONS

449 **The Epidermis of the Pea Epicotyl Is Not a Unique Target Tissue for Auxin-Induced Growth**—David L. Rayle*, Sogal Nowbar, and Robert E. Cleland

452 **Overproduction of Petunia Chloroplastic Copper/Zinc Superoxide Dismutase Does Not Confer Ozone Tolerance in Transgenic Tobacco**—Lynne H. Pitcher, Eileen Brennan, Arthur Hurley, Pamela Dunsmuir, James M. Tepperman, and Barbara A. Zilinskas*

456 **Gibberellic Acid Regulates the Level of a BiP Cognate in the Endoplasmic Reticulum of Barley Aleurone Cells**—Russell L. Jones* and Douglas S. Bush

460 **Expression of a Fungal Sesquiterpene Cyclase Gene in Transgenic Tobacco**—Thomas M. Hohn* and John B. Ohlrogge

463 **Fractionation of Carbon Isotopes during Biogenesis of Atmospheric Isoprene**—Thomas D. Sharkey*, Francesco Loreto, Charles F. Delwiche, and Isabel W. Treichel

PLANT GENE REGISTER

467 **Sequence of a Complementary DNA from *Cucumis sativus* L. Encoding the Stearoyl-Acyl-Carrier Protein Desaturase**—John Shanklin*, Chad Mullins, and Chris Somerville

469 **Amino Acid Sequence of an Algal Peptide Elongation Factor EF-2 Deduced from the Complementary DNA Sequence**—Gabriele Schnelbögl and Widmar Tanner*

472 **Barley Acyl Carrier Protein II: Nucleotide Sequence of cDNA Clones and Chromosomal Location of the *Acl2* Gene**—Lars Hansen* and Sakari Kauppinen

CORRECTION

475 **Sucrose Phosphate Synthase, a Key Enzyme for Sucrose Biosynthesis in Plants. Protein Purification from Corn Leaves and Immunological Detection (Vol. 96: 473–478, 1991)**—Jean-Michel Bruneau, Ann C. Worrell, Bernard Cambou, Danielle Lando, and Toni A. Voelker*

Number 2. October

ARTICLES

477 **Small Light-Harvesting Antenna Does Not Protect from Photoinhibition**—Esa Tyystjärvi*, Antti Koivuniemi, Reetta Kettunen, and Eva-Mari Aro

484 **Enhanced Photosynthesis and Stomatal Conductance of Pima Cotton (*Gossypium barbadense* L.) Bred for Increased Yield**—Katrina Cornish, John W. Radin*, Edgar L. Turcotte, Zhenmin Lu, and Eduardo Zeiger

490 **Tissue and Cellular Localization of Proteinase Inhibitors I and II in the Fruit of the Wild Tomato, *Lycopersicon peruvianum* (L.) Mill.**—Vincent P. M. Wingate, Vincent R. Franceschi, and Clarence A. Ryan*

496 **Uniquely Regulated Proteinase Inhibitor I Gene in a Wild Tomato Species. Inhibitor I Family Gene Is Wound-Inducible in Leaves and Developmentally Regulated in Fruit**—Vincent P. M. Wingate and Clarence A. Ryan*

502 **Nonsedimentable Microvesicles from Senescing Bean Cotyledons Contain Gel Phase-Forming Phospho-**

lipid Degradation Products—Kening Yao, Gopinadhan Paliyath, and John E. Thompson*

509 **Culm Brittleness of Barley (*Hordeum vulgare* L.) Mutants Is Caused by Smaller Number of Cellulose Molecules in Cell Wall**—Akira Kokubo, Naoki Sakurai, Susumu Kuraishi*, and Kazuyoshi Takeda

515 **Acclimation of CO_2 Assimilation in Cotton Leaves to Water Stress and Salinity**—Zvi Plaut* and Evelyn Federman

523 **Organ-Specific Invertase Deficiency in the Primary Root of an Inbred Maize Line**—Edwin R. Duke*, Donald R. McCarty, and Karen E. Koch

528 **Chemical Characterization of Stress-Induced Vascular Coating in Tomato**—Jane Robb*, Shin-Woo Lee, Royce Mohan, and Pappachan E. Kolattukudy

537 **Fe^{3+}-Chelate Reductase Activity of Plasma Membranes Isolated from Tomato (*Lycopersicon esculentum* Mill.) Roots. Comparison of Enzymes from Fe-Deficient and Fe-Sufficient Roots**—Marcia J. Holden, Douglas G. Luster*, Rufus L. Chaney, Thomas J. Buckhout, and Curtis Robinson

545 **Induction of Senescence-Like Deterioration of Microsomal Membranes from Cauliflower by Free Radicals Generated during Gamma Irradiation**—Richard Voisine, Louis-P. Vézina, and Claude Willemot*

551 **Tracing Cell Wall Biogenesis in Intact Cells and Plants. Selective Turnover and Alteration of Soluble and Cell Wall Polysaccharides in Grasses**—David M. Gibeaut and Nicholas C. Carpita*

562 **NaCl Regulation of Tonoplast ATPase 70-Kilodalton Subunit mRNA in Tobacco Cells**—Meena L. Narasimhan, Maria L. Binzel, Eva Perez-Prat, Zutang Chen, Donald E. Nelson, Narendra K. Singh, Ray A. Bressan, and Paul M. Hasegawa*

569 **Changes in β-1,3-Glucan Synthase Activity in Developing Lima Bean Plants**—Willie M. Dugger, Raymond L. Palmer, and Clanton C. Black*

574 **Evidence for Light-Dependent Recycling of Respired Carbon Dioxide by the Cotton Fruit**—Stan D. Wullschleger*, Derrick M. Oosterhuis, Robert G. Hurren, and Paul J. Hanson

580 **Surface Charge-Mediated Effects of Mg^{2+} on K^+ Flux across the Chloroplast Envelope Are Associated with Regulation of Stromal pH and Photosynthesis**—Weihua Wu, Jeanne Peters, and Gerald A. Berkowitz*

588 **Postanoxic Injury in Soybean (*Glycine max*) Seedlings**—Tara T. VanToai* and Christopher S. Bolles

593 **Abscisic Acid Induces Anaerobiosis Tolerance in Corn**—Shih-Ying Hwang and Tara T. VanToai*

598 **The K^+/Na^+ Selectivity of a Cation Channel in the Plasma Membrane of Root Cells Does Not Differ in Salt-Tolerant and Salt-Sensitive Wheat Species**—Daniel P. Schachtman*, Stephen D. Tyerman, and Bernard R. Terry

606 **Rapid Purification and Thermostability of the Cytoplasmic Aspartate Aminotransferase from Carrot Suspension Cultures**—Frank J. Turano, Barbara J. Wilson, and Benjamin F. Matthews*

613 **Characterization of Satellite DNA from Three Marine Dinoflagellates (Dinophyceae): *Glenodinium* sp. and Two Members of the Toxic Genus, *Protogonyaulax***—Barbara A. Boczar, John Liston, and Rose Ann Cattolico*

619 **Differential Effects of Elicitors on the Viability of Rice Suspension Cells**—Chikara Masuta, Marc Van den Bulcke, Guy Bauw, Marc Van Montagu*, and Allan B. Caplan

630 **Determination of the Cellular Mechanisms Regulating Thermo-Induced Stem Growth in *Thlaspi arvense* L.**—James D. Metzger* and Kendall Dusbabek

638 **Fluoride-Induced Inhibition of Starch Biosynthesis in Developing Potato, *Solanum tuberosum* L., Tubers Is Associated with Pyrophosphate Accumulation**—Roberto Viola* and Howard V. Davies

644 **Transport of Arginine and Aspartic Acid into Isolated Barley Mesophyll Vacuoles**—Enrico Martinoia*, Monika Thume, Esther Vogt, Doris Rentsch, and Karl-Josef Dietz

651 **Two Apoplastic α-Amylases Are Induced in Tobacco by Virus Infection**—Thierry Heitz, Pierrette Geoffroy, Bernard Fritig, and Michel Legrand*

657 **Overexpression of Acetohydroxyacid Synthase from *Arabidopsis* as an Inducible Fusion Protein in *Escherichia coli*. Production of Polyclonal Antibodies, and Immunological Characterization of the Enzyme**—Bijay Singh*, Gail Schmitt, Marcella Lillis, J. Mark Hand, and Rajeev Misra

663 **Effects of Chilling on the Biochemical and Functional Properties of Thylakoid Membranes**—Mark A. Walker*, Bryan D. McKersie, and K. Peter Pauls

670 **Abscisic Alcohol Is an Intermediate in Abscisic Acid Biosynthesis in a Shunt Pathway from Abscisic Aldehyde**—Christopher D. Rock, Timothy G. Heath, Douglas A. Gage, and Jan A. D. Zeevaart*

677 **Isolation and Expression of a Maize Type 1 Protein Phosphatase**—Robert D. Smith* and John C. Walker

684 **Rapid Enrichment of CHAPS-Solubilized UDP-Glucose: (1,3)-β-Glucan (Callose) Synthase from *Beta vulgaris* L. by Product Entrapment. Entrapment Mechanisms and Polypeptide Characterization**—Ayong Wu, Robert W. Harriman, David J. Frost, Stephen M. Read, and Bruce P. Wasserman*

693 **Elicitor-Inducible 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Activity Is Required for Sesquiterpene Accumulation in Tobacco Cell Suspension Cultures**—Joseph Chappell*, Carol VonLanken, and Urs Vögeli

699 **Induction and Regulation of Ethylene Biosynthesis by Pectic Oligomers in Cultured Pear Cells**—Alan D. Campbell* and John M. Labavitch

706 **Induction and Regulation of Ethylene Biosynthesis and Ripening by Pectic Oligomers in Tomato Pericarp Discs**—Alan D. Campbell* and John M. Labavitch

714 **Genetic Regulation of Development in *Sorghum bicolor*.**

VI. The ma_3^R Allele Results in Abnormal Phytochrome Physiology—Kevin L. Childs, Lee H. Pratt, and Page W. Morgan*

720 **Involvement of Wound and Climacteric Ethylene in Ripening Avocado Discs**—David A. Starrett and George G. Laties*

730 **Purification and Characterization of Pea Chloroplastic Phosphoriboisomerase**—Cynthia L. Skrukrud, Ilana M. Gordon, Sally Dorwin, Xiao-Hua Yuan, Göte Johansson, and Louise E. Anderson*

736 **Effects of the Gibberellin Biosynthetic Inhibitor Uniconazol on Mutants of *Arabidopsis***—Eiji Nambara, Takashi Akazawa, and Peter McCourt*

739 **Accumulation of β-Fructosidase in the Cell Walls of Tomato Roots following Infection by a Fungal Wilt Pathogen**—Nicole Benhamou*, Jean Grenier, and Maarten J. Chrispeels

751 **Anthocyanidins and Flavonols, Major *nod* Gene Inducers from Seeds of a Black-Seeded Common Bean (*Phaseolus vulgaris* L.)**—Mariangela Hungria, Cecillia M. Joseph, and Donald A. Phillips*

759 ***Rhizobium nod* Gene Inducers Exuded Naturally from Roots of Common Bean (*Phaseolus vulgaris* L.)**—Mariangela Hungria, Cecillia M. Joseph, and Donald A. Phillips*

765 **Occurrence and *in Vivo* Biosynthesis of Indole-3-Butyric Acid in Corn (*Zea mays* L.)**—Jutta Ludwig-Müller* and Ephraim Epstein

771 **The 32-Kilodalton Vegetative Storage Protein of *Salix microstachya* Turz. Characterization and Immunolocalization**—Suzanne Wetzel* and John S. Greenwood

778 **Cadaverine, an Essential Diamine for the Normal Root Development of Germinating Soybean (*Glycine max*) Seeds**—Andrea Gamarnik and Rosalia B. Frydman*

786 **Purification and Developmental Analysis of a Metalloendoproteinase from the Leaves of *Glycine max***—John S. Graham*, Jin Xiong, and Jeffery W. Gillikin

793 **Level of Abscisic Acid in Integuments, Nucellus, Endosperm, and Embryo of Peach Seeds (*Prunus persica* L. cv Springcrest) during Development**—Alberto Piaggesi*, Pierdomenico Perata, Claudio Vitagliano, and Amedeo Alpi

798 **Abscisic Acid Metabolism in Salt-Stressed Cells of *Dunaliella salina*. Possible Interrelationship with β-Carotene Accumulation**—A. Keith Cowan and Peter D. Rose

804 **Resistance to Low Temperature Photoinhibition Is Not Associated with Isolated Thylakoid Membranes of Winter Rye**—Line Lapointe, Norman P. A. Huner*, Robert Carpentier, and Christina Ottander

COMMUNICATIONS

811 **Regulation of Sucrose-Sucrose-Fructosyltransferase in Barley Leaves**—David M. Obenland, Urs Simmen, Thomas Boller, and Andres Wiemken*

814 **Cell Turgor Changes Associated with Ripening in Tomato Pericarp Tissue**—Kenneth A. Shackel*, Carl Greve, John M. Labavitch, and Hamid Ahmadi

817 **Wild-Type Levels of Abscisic Acid Are Not Required for Heat Shock Protein Accumulation in Tomato**—Elizabeth A. Bray

821 **Mycorrhizal Fungi and Nonhydraulic Root Signals of Soil Drying**—Robert M. Augé and Xiangrong Duan

825 **Control of Nitrogenase mRNA Levels by Products of Nitrate Assimilation in the Cyanobacterium *Anabaena* sp. Strain PCC 7120**—José Martín-Nieto, Antonia Herrero, and Enrique Flores*

829 **Evidence That More than 90% of β-Glucuronidase-Expressing Cells after Particle Bombardment Directly Receive the Foreign Gene in their Nucleus**—Toshiya Yamashita, Asako Iida, and Hiromichi Morikawa*

832 **Hygromycin Resistance Gene Cassettes for Vector Construction and Selection of Transformed Rice Protoplasts**—Zhenwei Zheng, Akio Hayashimoto, Zhijian Li, and Norimoto Murai*

836 **Inhibition of Lettuce Seed Germination by Cycloheximide and Chloramphenicol Is Alleviated by Kinetin and Oxygen**—Colleen Schultz and J. G. Chris Small*

PLANT GENE REGISTER

839 **Nucleotide Sequence of a Genomic Clone Encoding Arcelin, a Lectin-Like Seed Protein from *Phaseolus vulgaris***—Janice L. Anthony, Raymond A. Vonder Haar, and Timothy C. Hall*

841 **Promoter of a Lipid Transfer Protein Gene Expressed in Barley Aleurone Cells Contains Similar *myb* and *myc* Recognition Sites as the Maize *Bz-McC* Allele**—Casper Linnestad, Anders Lönneborg*, Roger Kalla, and Odd-Arne Olsen

844 **Nucleotide Sequence of a cDNA for Osmotin-Like Protein from Cultured Tobacco Cells**—Satomi Takeda, Fumihiko Sato*, Kazuko Ida, and Yasuyuki Yamada

847 **Cloning and Nucleotide Sequence of a Complementary DNA Encoding 3-Deoxy-D-*arabino*-Heptulosonate 7-Phosphate Synthase from Tobacco**—Yunxia Wang, Klaus M. Herrmann, Stephen C. Weller, and Peter B. Goldsbrough*

CORRECTION

1323 **Bifunctional Protein in Carrot Contains Both Aspartokinase and Homoserine Dehydrogenase Activities**—Barbara J. Wilson, Ann C. Gray, and Benjamin F. Matthews*

1329 **Association of Phospho*enol*pyruvate Phosphatase Activity with the Cytosolic Pyruvate Kinase of Germinating Mung Beans**—Florencio E. Podestá and William C. Plaxton*

1334 **Leucoplast Pyruvate Kinase from Developing Castor Oil Seeds. Characterization of the Enzyme's Degradation by a Cysteine Endopeptidase**—William C. Plaxton

1339 **Imidazolinone-Induced Loss of Acetohydroxyacid Synthase Activity in Maize Is Not Due to the Enzyme Degradation**—Dale L. Shaner and Bijay K. Singh*

1348 **Xylulose 1,5-Bisphosphate Synthesized by Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase during Catalysis Binds to Decarbamylated Enzyme**—Genhai Zhu and Richard G. Jensen*

1354 **Fallover of Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase Activity. Decarbamylation of Catalytic Sites Depends on pH**—Genhai Zhu and Richard G. Jensen*

1375 **Nitrogen Metabolism in the Stalk Tissue of Maize**—Chanh T. Ta

1381 **Mitochondrial Malate Dehydrogenase from Corn. Purification of Multiple Forms**—Marianne K. Hayes, Michael H. Luethy*, and Thomas E. Elthon

1388 **Effects of O_2 and CO_2 Concentrations on Quantum Yields of Photosystems I and II in Tobacco Leaf Tissue**—Richard B. Peterson

1395 **Expression of Maize Ferredoxin cDNA in *Escherichia coli*. Comparison of Photosynthetic and Nonphotosynthetic Ferredoxin Isoproteins and their Chimeric Molecule**—Toshiharu Hase*, Sachiko Mizutani, and Yasuo Mukohata

1402 **Three RNases in Senescent and Nonsenescent Wheat Leaves. Characterization by Activity Staining in Sodium Dodecyl Sulfate-Polyacrylamide Gels**—A. Blank and Thomas A. McKeon*

1439 **Utilization of Inorganic Carbon by *Ulva lactuca***—Zivia Dræchsler and Sven Beer*

1456 **Cell Wall Metabolism in Ripening Fruit. V. Analysis of Cell Wall Synthesis in Ripening Tomato Pericarp Tissue Using a D-[U-^{13}C]Glucose Tracer and Gas Chromatography-Mass Spectrometry**—L. Carl Greve and John M. Labavitch*

1476 **Effect of Light and NO_3^- on Wheat Leaf Phospho*enol*pyruvate Carboxylase Activity. Evidence for Covalent Modulation of the C_3 Enzyme**—Le Van Quy, Christine Foyer, and Marie-Louise Champigny*

1487 **Identification and Properties of the Major Ribonucleases of *Arabidopsis thaliana***—Yang Yen and Pamela J. Green*

1494 **Phenylalanine Ammonia-Lyase from Tomato Cell Cultures Inoculated with *Verticillium albo-atrum***—Mark A. Bernards and Brian E. Ellis*

1551 **Lidocaine and ATPase Inhibitor Interaction with the Chloroplast Envelope**—Weihua Wu and Gerald A. Berkowitz*

1565 **ADP-Glucose Transport by the Chloroplast Adenylate Translocator Is Linked to Starch Biosynthesis**—Javier Pozueta-Romero, Fernando Ardila, and Takashi Akazawa*

1576 **Simplified Procedure for the Isolation of Intact Chloroplasts from *Chlamydomonas reinhardtii***—

Catherine B. Mason, Sharon Matthews, Terry M. Bricker, and James V. Moroney*

1588 **Enzymatic Synthesis of Isoprene from Dimethylallyl Diphosphate in Aspen Leaf Extracts**—Gary M. Silver and Ray Fall*

MOLECULAR BIOLOGY AND GENE REGULATION

7 **Stress Responses in Alfalfa (*Medicago sativa* L.). X. Molecular Cloning and Expression of *S*-Adenosyl-L-Methionine:Caffeic Acid 3-*O*-Methyltransferase, a Key Enzyme of Lignin Biosynthesis**—Ganesan Gowri, Robert C. Bugos, Wilbur H. Campbell, Carl A. Maxwell, and Richard A. Dixon*

80 **Molecular Cloning of Tomato Pectin Methylesterase Gene and its Expression in Rutgers, Ripening Inhibitor, Nonripening, and Never Ripe Tomato Fruits**—Robert W. Harriman, Denise M. Tieman, and Avtar K. Handa*

139 **Acid Phosphatase-1 from Nematode Resistant Tomato. Isolation and Characterization of its Gene**—Valerie M. Williamson* and Greggory Colwell

147 **Light Intensity-Induced Changes in *cab* mRNA and Light Harvesting Complex II Apoprotein Levels in the Unicellular Chlorophyte *Dunaliella tertiolecta***—Julie LaRoche*, Anne Mortain-Bertrand, and Paul G. Falkowski

317 **Cloning and Sequencing of the cDNA Encoding the Rubber Elongation Factor of *Hevea brasiliensis***—Elisabeth Goyvaerts*, Mark Dennis, David Light, and Nam-Hai Chua

335 **Regulation of Light-Induced Chloroplast Transcription and Translation in Eight-Day-Old Dark-Grown Barley Seedlings**—Robert R. Klein

375 **Plastid Import and Iron-Sulfur Cluster Assembly of Photosynthetic and Nonphotosynthetic Ferredoxin Isoproteins in Maize**—Shoichi Suzuki, Keiji Izumihara, and Toshiharu Hase*

433 **Regulation of a Chitinase Gene Promoter by Ethylene and Elicitors in Bean Protoplasts**—Dominique Roby, Karen Broglie, John Gaynor, and Richard Broglie*

460 **Expression of a Fungal Sesquiterpene Cyclase Gene in Transgenic Tobacco**—Thomas M. Hohn* and John B. Ohlrogge

467 **Sequence of a Complementary DNA from *Cucumis sativus* L. Encoding the Stearoyl-Acyl-Carrier Protein Desaturase**—John Shanklin*, Chad Mullins, and Chris Somerville

469 **Amino Acid Sequence of an Algal Peptide Elongation Factor EF-2 Deduced from the Complementary DNA Sequence**—Gabriele Schnelbögl and Widmar Tanner*

472 **Barley Acyl Carrier Protein II: Nucleotide Sequence of cDNA Clones and Chromosomal Location of the *Acl2* Gene**—Lars Hansen* and Sakari Kauppinen

496 **Uniquely Regulated Proteinase Inhibitor I Gene in a Wild Tomato Species. Inhibitor I Family Gene Is Wound-Inducible in Leaves and Developmentally Regulated in Fruit**—Vincent P. M. Wingate and Clarence A. Ryan*

613 **Characterization of Satellite DNA from Three Marine Dinoflagellates (Dinophyceae): *Glenodinium* sp. and Two Members of the Toxic Genus, *Protogonyaulax***—Barbara A. Boczar, John Liston, and Rose Ann Cattolico*

657 **Overexpression of Acetohydroxyacid Synthase from *Arabidopsis* as an Inducible Fusion Protein in *Escherichia coli*. Production of Polyclonal Antibodies, and Immunological Characterization of the Enzyme**—Bijay Singh*, Gail Schmitt, Marcella Lillis, J. Mark Hand, and Rajeev Misra

677 **Isolation and Expression of a Maize Type 1 Protein Phosphatase**—Robert D. Smith* and John C. Walker

829 **Evidence That More than 90% of β-Glucuronidase-Expressing Cells after Particle Bombardment Directly Receive the Foreign Gene in their Nucleus**—Toshiya Yamashita, Asako Iida, and Hiromichi Morikawa*

832 **Hygromycin Resistance Gene Cassettes for Vector Construction and Selection of Transformed Rice Protoplasts**—Zhenwei Zheng, Akio Hayashimoto, Zhijian Li, and Norimoto Murai*

839 **Nucleotide Sequence of a Genomic Clone Encoding Arcelin, a Lectin-Like Seed Protein from *Phaseolus vulgaris***—Janice L. Anthony, Raymond A. Vonder Haar, and Timothy C. Hall*

841 **Promoter of a Lipid Transfer Protein Gene Expressed in Barley Aleurone Cells Contains Similar *myb* and *myc* Recognition Sites as the Maize *Bz-McC* Allele**—Casper Linnestad, Anders Lönneborg*, Roger Kalla, and Odd-Arne Olsen

844 **Nucleotide Sequence of a cDNA for Osmotin-Like Protein from Cultured Tobacco Cells**—Satomi Takeda, Fumihiko Sato*, Kazuko Ida, and Yasuyuki Yamada

847 **Cloning and Nucleotide Sequence of a Complementary DNA Encoding 3-Deoxy-D-*arabino*-Heptulosonate 7-Phosphate Synthase from Tobacco**—Yunxia Wang, Klaus M. Herrmann, Stephen C. Weller, and Peter B. Goldsbrough*

873 **Effect of Chlorate Treatment on Nitrate Reductase and Nitrite Reductase Gene Expression in *Arabidopsis thaliana***—Samuel T. LaBrie, Jack Q. Wilkinson, and Nigel M. Crawford*

900 **Nucleotide Sequence and Spatial Expression Pattern of a Drought- and Abscisic Acid-Induced Gene of Tomato**—Áine L. Plant, Amybeth Cohen, Meena S. Moses, and Elizabeth A. Bray*

969 **Effects of Exogenous Auxins on Expression of Lipoxygenases in Cultured Soybean Embryos**—Wennuan Liu, David F. Hildebrand, W. Scott Grayburn, Gregory C. Phillips, and Glenn B. Collins*

1044 **Molecular Basis of Imidazolinone Herbicide Resistance in *Arabidopsis thaliana* var Columbia**—Kanagasabapathi Sathasivan, George W. Haughn, and Norimoto Murai*

1260 **Abscisic Acid Negatively Regulates Expression of Chlorophyll *a/b* Binding Protein Genes during Soybean Embryogeny**—Yun C. Chang and Linda L. Walling*

1268 **Sequence of the *Gossypium hirsutum* D-Genome Alloallele of *Legumin A* and Its mRNA**—Glenn A. Galau*, Helen Y.-C. Wang, and D. Wayne Hughes

1367 **Organ-Specific and Environmentally Regulated Expression of Two Abscisic Acid-Induced Genes of Tomato. Nucleotide Sequence and Analysis of the Corresponding cDNAs**—Amybeth Cohen, Áine L. Plant, Meena S. Moses, and Elizabeth A. Bray*

1414 **Sugar-Dependent Expression of the *CHS-A* Gene for Chalcone Synthase from Petunia in Transgenic *Arabidopsis***—Hirokazu Tsukaya, Toshiyuki Ohshima, Satoshi Naito, Mitsuo Chino, and Yoshibumi Komeda*

1462 **Isolation and Characterization of a Tomato Acid Phosphatase Complementary DNA Associated with Nematode Resistance**—Jack L. Erion*, Barbara Ballo, Lisa May, John Bussell, Tim Fox, and Steve R. Thomas

1581 **Transient Down-Regulation of Phytochrome mRNA Abundance in Etiolated Cucumber Cotyledons in Response to Continuous White Light**—T. Shamala Tirimanne and James T. Colbert*

1585 **Efficiency of Particle-Bombardment-Mediated Transformation Is Influenced by Cell Cycle Stage in Synchronized Cultured Cells of Tobacco**—Asako Iida, Toshiya Yamashita, Yasuyuki Yamada, and Hiromichi Morikawa*

1592 **Leaf Catalase mRNA and Catalase-Protein Levels in a High-Catalase Tobacco Mutant with O_2-Resistant Photosynthesis**—Israel Zelitch*, Evelyn A. Havir, Brian McGonigle, Neil A. McHale, and Timothy Nelson

1596 **Nucleotide Sequence for the Genomic DNA Encoding the Chloroplast ATP Synthase γ-Subunit Gene (*atpC*) from *Chlamydomonas reinhardtii***—Eric J. Smart* and Bruce R. Selman

1599 **Nucleotide Sequence of a cDNA Clone Encoding a β-Amylase from *Arabidopsis thaliana***—Jonathan D. Monroe, Mark D. Salminen, and Jack Preiss*

1602 **Korean Ginseng Mitochondrial DNA Encodes an Intact *rps12* Gene Downstream of the *nad3* Gene**—Kab-Sig Kim*, Wolfgang Schuster, Axel Brennicke, and Kwang-Tae Choi

1604 **Nucleotide Sequence of a cDNA Clone Encoding γ-Coixin from *Coix lacryma-jobi* Seeds**—Adilson Leite, Fernando Augusto de Freitas, José Andrés Yunes, and Paulo Arruda*

1606 **Nucleotide Sequence of a cDNA Clone Encoding γ-Kafirin Protein from *Sorghum bicolor***—Everaldo G. de Barros, Koichi Takasaki, Allen W. Kirleis, and Brian A. Larkins*

ENVIRONMENTAL AND STRESS PHYSIOLOGY

50 **SO_2 Effect on Photosynthetic Activities of Intact Sugar Maple Leaves as Detected by Photoacoustic Spectroscopy**—Konka Veeranjaneyulu, Christophe N. N'soukpoé-Kossi, and Roger M. Leblanc*

88 **Metabolic Bases for Differences in Sensitivity of Two Pea Cultivars to Sulfur Dioxide**—Nageswara R. Madamanchi and Ruth G. Alscher*

112 **Growth and Photosynthetic Characteristics of *Solanum tuberosum* Plantlets Cultivated *in Vitro* in Different Conditions of Aeration, Sucrose Supply, and CO_2 Enrichment**—Laurent Cournac*, Bernard Dimon, Patrick Carrier, Aimée Lohou, and Pierre Chagvardieff

128 **Cysteine, γ-Glutamylcysteine, and Glutathione Levels in Maize Seedlings. Distribution and Translocation in Normal and Cadmium-Exposed Plants**—Wilfried E. Rauser*, Robert Schupp, and Heinz Rennenberg

154 **Influence of Water Deficit on Maize Endosperm Development. Enzyme Activities and RNA Transcripts of Starch and Zein Synthesis, Abscisic Acid, and Cell Division**—Eric S. Ober, Tim L. Setter*, James T. Madison, John F. Thompson, and Paul S. Shapiro

165 **Relevance of Amadori and Maillard Products to Seed Deterioration**—Scott H. Wettlaufer and A. Carl Leopold*

170 **Delayed Onset of Isoprene Emission in Developing Velvet Bean (*Mucuna* sp.) Leaves**—Jennifer Grinspoon, William D. Bowman, and Ray Fall*

175 **Microtubules in Mesophyll Cells of Nonacclimated and Cold-Acclimated Spinach. Visualization and Responses to Freezing, Low Temperature, and Dehydration**—Michael E. Bartolo and John V. Carter*

182 **Effect of Microtubule Stabilization on the Freezing Tolerance of Mesophyll Cells of Spinach**—Michael E. Bartolo and John V. Carter*

188 **Influence of Water and Temperature Stress on the Temperature Dependence of the Reappearance of Variable Fluorescence following Illumination**—David L. Ferguson and John J. Burke*

193 **Electrical Potentials during Gravitropism in Bean Epicotyls**—Kazuyuki Imagawa, Kiyoshi Toko*, Shu Ezaki, Kenshi Hayashi, and Kaoru Yamafuji

245 **Response of Soybean Photosynthesis and Chloroplast Membrane Function to Canopy Development and Mutual Shading**—Kent O. Burkey* and Randy Wells

280 **Physiological Basis for Differential Sensitivities of Plant Species to Protoporphyrinogen Oxidase-Inhibiting Herbicides**—Timothy D. Sherman, José M. Becerril, Hiroshi Matsumoto, Mary V. Duke, Judith M. Jacobs, Nicholas J. Jacobs, and Stephen O. Duke*

298 **Effects of Mild Water Stress and Diurnal Changes in Temperature and Humidity on the Stable Oxygen and Hydrogen Isotopic Composition of Leaf Water in *Cornus stolonifera* L.**—Lawrence B. Flanagan* and James R. Ehleringer

306 **Phytochelatin Accumulation and Cadmium Tolerance in Selected Tomato Cell Lines**—Subhash C. Gupta and Peter B. Goldsbrough*

313 **Influence of Ozone on the Stable Carbon Isotope Composition, $\delta^{13}C$, of Leaves and Grain of Spring Wheat (*Triticum aestivum* L.)**—Matthias Saurer, Jürg Fuhrer*, and Ulrich Siegenthaler

366 **Germin-Like Polypeptides Increase in Barley Roots during Salt Stress**—William J. Hurkman*, H. Peggy Tao, and Charlene K. Tanaka

415 **Biochemical Correlates of the Circadian Rhythm in Photosynthesis in *Phaseolus vulgaris***—Arthur L. Fredeen, Timothy L. Hennessey, and Christopher B. Field*

426 **Temperature-Dependent Water and Ion Transport Properties of Barley and Sorghum Roots. I. Relationship to Leaf Growth**—Hormoz BassiriRad, John W. Radin*, and Kaoru Matsuda

452 **Overproduction of Petunia Chloroplastic Copper/Zinc Superoxide Dismutase Does Not Confer Ozone Tolerance in Transgenic Tobacco**—Lynne H. Pitcher, Eileen Brennan, Arthur Hurley, Pamela Dunsmuir, James M. Tepperman, and Barbara A. Zilinskas*

463 **Fractionation of Carbon Isotopes during Biogenesis of Atmospheric Isoprene**—Thomas D. Sharkey*, Francesco Loreto, Charles F. Delwiche, and Isabel W. Treichel

484 **Enhanced Photosynthesis and Stomatal Conductance of Pima Cotton (*Gossypium barbadense* L.) Bred for Increased Yield**—Katrina Cornish, John W. Radin*, Edgar L. Turcotte, Zhenmin Lu, and Eduardo Zeiger

515 **Acclimation of CO_2 Assimilation in Cotton Leaves to Water Stress and Salinity**—Zvi Plaut* and Evelyn Federman

562 **NaCl Regulation of Tonoplast ATPase 70-Kilodalton Subunit mRNA in Tobacco Cells**—Meena L. Narasimhan, Maria L. Binzel, Eva Perez-Prat, Zutang Chen, Donald E. Nelson, Narendra K. Singh, Ray A. Bressan, and Paul M. Hasegawa*

574 **Evidence for Light-Dependent Recycling of Respired Carbon Dioxide by the Cotton Fruit**—Stan D. Wullschleger*, Derrick M. Oosterhuis, Robert G. Hurren, and Paul J. Hanson

588 **Postanoxic Injury in Soybean (*Glycine max*) Seedlings**—Tara T. VanToai* and Christopher S. Bolles

593 **Abscisic Acid Induces Anaerobiosis Tolerance in Corn**—Shih-Ying Hwang and Tara T. VanToai*

663 **Effects of Chilling on the Biochemical and Functional Properties of Thylakoid Membranes**—Mark A. Walker*, Bryan D. McKersie, and K. Peter Pauls

798 **Abscisic Acid Metabolism in Salt-Stressed Cells of *Dunaliella salina*. Possible Interrelationship with β-Carotene Accumulation**—A. Keith Cowan and Peter D. Rose

804 **Resistance to Low Temperature Photoinhibition Is Not Associated with Isolated Thylakoid Membranes of Winter Rye**—Line Lapointe, Norman P. A. Huner*, Robert Carpentier, and Christina Ottander

817 **Wild-Type Levels of Abscisic Acid Are Not Required for Heat Shock Protein Accumulation in Tomato**—Elizabeth A. Bray

821 **Mycorrhizal Fungi and Nonhydraulic Root Signals of Soil Drying**—Robert M. Augé and Xiangrong Duan

863 **Effects of Elevated Cytosolic Glutathione Reductase Activity on the Cellular Glutathione Pool and Photosynthesis in Leaves under Normal and Stress Conditions**—Christine Foyer*, Maud Lelandais, Camille Galap, and Karl Josef Kunert

886 **Chlorophyll Fluorescence and Photon Yield of Oxygen Evolution in Iron-Deficient Sugar Beet (*Beta vulgaris* L.) Leaves**—Fermín Morales, Anunciación Abadía, and Javier Abadía*

907 **Maintenance of Turgor by Rapid Sealing of Puncture Wounds in Leaf Epidermal Cells**—Kenneth A. Shackel*, Vito S. Polito, and Hamid Ahmadi

921 **Diacylglycerol Metabolism in the Green Alga *Dunaliella salina* under Osmotic Stress. Possible Role of Diacylglycerols in Phospholipase C-Mediated Signal Transduction**—Kwon Soo Ha and Guy A. Thompson, Jr.*

954 **Changes in Osmotic Pressure and Mucilage during Low-Temperature Acclimation of *Opuntia ficus-indica***—Guillermo Goldstein and Park S. Nobel*

990 **Ion Relations of Symplastic and Apoplastic Space in Leaves from *Spinacia oleracea* L. and *Pisum sativum* L. under Salinity**—Michael Speer and Werner M. Kaiser*

998 **Environmental Control of Phospho*enol*pyruvate Carboxylase Induction in Mature *Mesembryanthemum crystallinum* L.**—Mechtild Piepenbrock and Jürgen M. Schmitt*

1017 **Vegetative Storage Proteins in Poplar. Induction and Characterization of a 32- and a 36-Kilodalton Polypeptide**—Ulrike Langheinrich* and Rudolf Tischner

1073 **Effect of Sucrose on Phase Behavior of Membranes in Intact Pollen of *Typha latifolia* L., as Measured with Fourier Transform Infrared Spectroscopy**—Folkert A. Hoekstra*, John H. Crowe, and Lois M. Crowe

1122 **Action Spectrum for Resetting the Circadian Phototaxis Rhythm in the CW15 Strain of *Chlamydomonas*. II. Illuminated Cells**—Carl Hirschie Johnson*, Takao Kondo, and John Woodland Hastings

1136 **Effects of Salinity on Water Transport of Excised Maize (*Zea mays* L.) Roots**—Hassan Azaizeh and Ernst Steudle*

1146 **Water Relations of *Pachysandra* Leaves during Freezing and Thawing. Evidence for a Negative Pressure Potential Alleviating Freeze-Dehydration Stress**—Jian-Jun Zhu and Erwin Beck*

1154 **Computer-Simulated Evaluation of Possible Mechanisms for Quenching Heavy Metal Ion Activity in Plant Vacuoles. I. Cadmium**—Jian Wang*, Bill P. Evangelou, Mark T. Nielsen, and George J. Wagner

1161 **Induction by Electric Currents of Ethylene Biosynthesis in Cucumber (*Cucumis sativus* L.) Fruit**—

Akitsugu Inaba*, Jun Ping Gao, and Reinosuke Nakamura

1196 **Autotrophy in Maize Husk Leaves. Evaluation Using Natural Abundance of Stable Isotopes**—Dan Yakir*, Barry Osmond, and Larry Giles

1199 **Comparative Physiological Evidence that β-Alanine Betaine and Choline-*O*-Sulfate Act as Compatible Osmolytes in Halophytic *Limonium* Species**—Andrew D. Hanson*, Bala Rathinasabapathi, Beverly Chamberlin, and Douglas A. Gage

1226 **Amine Accumulation in Acidic Vacuoles Protects the Halotolerant Alga *Dunaliella salina* Against Alkaline Stress**—Uri Pick*, Orly Zeelon, and Meira Weiss

1234 **Polyphosphate Hydrolysis within Acidic Vacuoles in Response to Amine-Induced Alkaline Stress in the Halotolerant Alga *Dunaliella salina***—Uri Pick* and Meira Weiss

1241 **Hydrolysis of Polyphosphates and Permeability Changes in Response to Osmotic Shocks in Cells of the Halotolerant Alga *Dunaliella***—Meira Weiss, Michal Bental, and Uri Pick*

1265 **Abrupt Increase in the Level of Hydrogen Peroxide in Leaves of Winter Wheat Is Caused by Cold Treatment**—Tohru Okuda, Yusuke Matsuda, Akira Yamanaka, and Shonosuke Sagisaka*

1280 **Biochemical Plant Responses to Ozone. II. Induction of Stilbene Biosynthesis in Scots Pine (*Pinus sylvestris* L.) Seedlings**—Detlef Rosemann, Werner Heller*, and Heinrich Sandermann, Jr.

1287 **Photosynthetic Characteristics of Rice Leaves Aged under Different Irradiances from Full Expansion through Senescence**—Jun Hidema, Amane Makino*, Tadahiko Mae, and Kunihiko Ojima

1302 **Role of the Root Apoplasm for Iron Acquisition by Wheat Plants**—Fu-suo Zhang, Volker Römheld, and Horst Marschner*

1430 **Heat Shock Proteins in Two Lines of *Zea mays* L. That Differ in Drought and Heat Resistance**—Zoran Ristic*, David J. Gifford, and David D. Cass

1470 **Kinetics for Phototropic Curvature by Etiolated Seedlings of *Arabidopsis thaliana***—Vladimir Orbović and Kenneth L. Poff*

1501 **Influence of Protoplasmic Water Loss on the Control of Protein Synthesis in the Desiccation-Tolerant Moss *Tortula ruralis*. Ramifications for a Repair-Based Mechanism of Desiccation Tolerance**—Melvin J. Oliver

DEVELOPMENT AND GROWTH REGULATION

26 **Metabolism of Gibberellin A_{12} and A_{12}-Aldehyde in Developing Seeds of *Pisum sativum* L.**—Yu-xian Zhu, Peter J. Davies*, and Anna Halinska

60 **Modulation of Auxin-Binding Proteins in Cell Suspensions. I. Differential Responses of Carrot Embryo Cultures**—Fiorella LoSchiavo, Francesco Filippini, Fabrizio Cozzani, Daniela Vallone, and Mario Terzi*

118 **Action Spectrum for the Light-Dependent Step in Gametic Differentiation of *Chlamydomonas reinhardtii***—Helge Weissig and Christoph F. Beck*

122 **Ethylene Production and 1-Aminocyclopropane-1-Carboxylic Acid Conjugation in Thermoinhibited *Cicer arietinum* L. Seeds**—Mercedes Gallardo, María del Mar Delgado, Isabel María Sánchez-Calle, and Angel Jesús Matilla*

212 **Single *rol* Genes from the *Agrobacterium rhizogenes* T_L-DNA Alter Some of the Cellular Responses to Auxin in *Nicotiana tabacum***—Christophe Maurel*, Hélène Barbier-Brygoo, Angelo Spena, Jacques Tempé, and Jean Guern

288 **Activity and Accumulation of Cell Division-Promoting Phenolics in Tobacco Tissue Cultures**—Rita A. Teutonico, Matthew W. Dudley, John D. Orr, David G. Lynn, and Andrew N. Binns*

343 **Dihydroflavonol Reductase Activity in Relation to Differential Anthocyanin Accumulation in Juvenile and Mature Phase *Hedera helix* L.**—John R. Murray and Wesley P. Hackett*

352 **Red Light-Regulated Growth. I. Changes in the Abundance of Indoleacetic Acid and a 22-Kilodalton Auxin-Binding Protein in the Maize Mesocotyl**—Alan M. Jones*, Deborah S. Cochran, Patrick M. Lamerson, Michael L. Evans, and Jerry D. Cohen

359 **Morphological Responses of Wheat to Changes in Phytochrome Photoequilibrium**—Charles Barnes* and Bruce Bugbee

402 ***In Vitro* Flower Bud Formation in Tobacco: Interaction of Hormones**—Anton J. M. Peeters, Will Gerards, Gerard W. M. Barendse*, and George J. Wullems

409 **Characterization of the Arrest in Anther Development Associated with Gibberellin Deficiency of the *gib-1* Mutant of Tomato**—Steven E. Jacobsen and Neil E. Olszewski*

440 **Carbon Transfer and Partitioning between Vegetative and Reproductive Organs in *Pisum sativum* L.**—Marie-Hélène Jeuffroy* and Fernand R. Warembourg

449 **The Epidermis of the Pea Epicotyl Is Not a Unique Target Tissue for Auxin-Induced Growth**—David L. Rayle*, Sogal Nowbar, and Robert E. Cleland

509 **Culm Brittleness of Barley (*Hordeum vulgare* L.) Mutants Is Caused by Smaller Number of Cellulose Molecules in Cell Wall**—Akira Kokubo, Naoki Sakurai, Susumu Kuraishi*, and Kazuyoshi Takeda

569 **Changes in β-1,3-Glucan Synthase Activity in Developing Lima Bean Plants**—Willie M. Dugger, Raymond L. Palmer, and Clanton C. Black*

619 **Differential Effects of Elicitors on the Viability of Rice Suspension Cells**—Chikara Masuta, Marc Van den Bulcke, Guy Bauw, Marc Van Montagu*, and Allan B. Caplan

630 **Determination of the Cellular Mechanisms Regulating Thermo-Induced Stem Growth in *Thlaspi arvense* L.**—James D. Metzger* and Kendall Dusbabek

670 **Abscisic Alcohol Is an Intermediate in Abscisic Acid**

Biosynthesis in a Shunt Pathway from Abscisic Aldehyde—Christopher D. Rock, Timothy G. Heath, Douglas A. Gage, and Jan A. D. Zeevaart*

699 **Induction and Regulation of Ethylene Biosynthesis by Pectic Oligomers in Cultured Pear Cells**—Alan D. Campbell* and John M. Labavitch

706 **Induction and Regulation of Ethylene Biosynthesis and Ripening by Pectic Oligomers in Tomato Pericarp Discs**—Alan D. Campbell* and John M. Labavitch

714 **Genetic Regulation of Development in *Sorghum bicolor*. VI. The ma_3^R Allele Results in Abnormal Phytochrome Physiology**—Kevin L. Childs, Lee H. Pratt, and Page W. Morgan*

720 **Involvement of Wound and Climacteric Ethylene in Ripening Avocado Discs**—David A. Starrett and George G. Laties*

736 **Effects of the Gibberellin Biosynthetic Inhibitor Uniconazol on Mutants of *Arabidopsis***—Eiji Nambara, Takashi Akazawa, and Peter McCourt*

765 **Occurrence and *in Vivo* Biosynthesis of Indole-3-Butyric Acid in Corn (*Zea mays* L.)**—Jutta Ludwig-Müller* and Ephraim Epstein

793 **Level of Abscisic Acid in Integuments, Nucellus, Endosperm, and Embryo of Peach Seeds (*Prunus persica* L. cv Springcrest) during Development**—Alberto Piaggesi*, Pierdomenico Perata, Claudio Vitagliano, and Amedeo Alpi

814 **Cell Turgor Changes Associated with Ripening in Tomato Pericarp Tissue**—Kenneth A. Shackel*, Carl Greve, John M. Labavitch, and Hamid Ahmadi

836 **Inhibition of Lettuce Seed Germination by Cycloheximide and Chloramphenicol Is Alleviated by Kinetin and Oxygen**—Colleen Schultz and J. G. Chris Small*

1051 **Oilbody Proteins in Microspore-Derived Embryos of *Brassica napus*. Hormonal, Osmotic, and Developmental Regulation of Synthesis**—Larry A. Holbrook, Gijs J. H. van Rooijen, Ronald W. Wilen, and Maurice M. Moloney*

1087 **Mutant of *Arabidopsis* Deficient in Xylem Loading of Phosphate**—Yves Poirier*, Sharon Thoma, Chris Somerville, and John Schiefelbein

1166 **Physiology of Hormone Autonomous Tissue Lines Derived from Radiation-Induced Tumors of *Arabidopsis thaliana***—Bruce R. Campell* and Christopher D. Town

1253 **Jasmonic Acid Induces Tuberization of Potato Stolons Cultured *in Vitro***—Ana M. Pelacho and Angel M. Mingo-Castel*

1256 **Effect of Hydrogen Cyanamide on Amino Acid Profiles in Kiwifruit Buds during Budbreak**—Eric F. Walton*, Christopher J. Clark, and Helen L. Boldingh

1306 **Protein Compositions of Mesophyll and Paraveinal Mesophyll of Soybean Leaves at Various Developmental Stages**—Stephen F. Klauer, Vincent R. Franceschi*, and Maurice S. B. Ku

1359 **[^{14}C]GA_{12}-Aldehyde, [^{14}C]GA_{12}, and [^{2}H]- and [^{14}C]-GA_{53} Metabolism by Elongating Pea Pericarp**—Sonja L. Maki* and Mark L. Brenner

1409 **Expression of Three RNase Activities during Natural and Dark-Induced Senescence of Wheat Leaves**—A. Blank and Thomas A. McKeon*

1422 **Turnover of Catalase Heme and Apoprotein Moieties in Cotyledons of Sunflower Seedlings**—Rainer Eising* and Benno Süselbeck

1435 **Role of Ethylene in the Germination of the Hemiparasite *Striga hermonthica***—David C. Logan* and George R. Stewart

1521 **Identification of Gibberellins in Spinach and Effects of Light and Darkness on their Levels**—Manuel Talon, Jan A. D. Zeevaart*, and Douglas A. Gage

CELLULAR AND STRUCTURAL BIOLOGY

34 **Superoxide Dismutase in the Symbiont *Anabaena azollae* Strasb.**—A. Canini, F. Galiazzo, G. Rotilio, and M. Grilli Caiola*

456 **Gibberellic Acid Regulates the Level of a BiP Cognate in the Endoplasmic Reticulum of Barley Aleurone Cells**—Russell L. Jones* and Douglas S. Bush

490 **Tissue and Cellular Localization of Proteinase Inhibitors I and II in the Fruit of the Wild Tomato, *Lycopersicon peruvianum* (L.) Mill.**—Vincent P. M. Wingate, Vincent R. Franceschi, and Clarence A. Ryan*

551 **Tracing Cell Wall Biogenesis in Intact Cells and Plants. Selective Turnover and Alteration of Soluble and Cell Wall Polysaccharides in Grasses**—David M. Gibeaut and Nicholas C. Carpita*

771 **The 32-Kilodalton Vegetative Storage Protein of *Salix microstachya* Turz. Characterization and Immunolocalization**—Suzanne Wetzel* and John S. Greenwood

856 **Purification and Characterization of Two Major Lectins from *Araucaria brasiliensis* syn. *Araucaria angustifolia* Seeds (Pinhão)**—Pradip K. Datta, Maria O. D. C. R. Figueroa, and Franco M. Lajolo*

936 **Isolation and Partial Characterization of a Factor from Barley Aleurone that Modifies α-Amylase *in Vitro***—Liliane Sticher and Russell L. Jones*

1483 **Vacuolar Release of 1-(Malonylamino)cyclopropane-1-Carboxylic Acid, the Conjugated Form of the Ethylene Precursor**—Maria A. Pedreño, Mondher Bouzayen, Jean Claude Pech, Gérard Marigo, and Alain Latché*

1512 **Methyl Jasmonate Treatment Eliminates Cell-Specific Expression of Vegetative Storage Protein Genes in Soybean Leaves**—Jing-Feng Huang, David J. Bantroch, John S. Greenwood, and Paul E. Staswick*

1558 **Stromal Low Temperature Compartment Derived from the Inner Membrane of the Chloroplast Envelope**—D. James Morré*, Gun Selldén, Christer Sundqvist, and Anna Stina Sandelius

MICROBE-PLANT INTERACTIONS

19 **Elicitor-Induced Ethylene Biosynthesis in Tomato Cells. Characterization and Use as a Bioassay for Elicitor Action**—Georg Felix, Debora G. Grosskopf, Martin Regenass, Christoph W. Basse, and Thomas Boller*

94 **A Lipoxygenase Pathway Is Activated in Rice after Infection with the Rice Blast Fungus *Magnaporthe grisea***—Hiroyuki Ohta*, Kan Shida, You-Liang Peng, Iwao Furusawa, Jiko Shishiyama, Shigeo Aibara, and Yuhei Morita

234 **Cell Surface Interactions between Bean Leaf Cells and *Colletotrichum lindemuthianum*. Cytochemical Aspects of Pectin Breakdown and Fungal Endopolygalacturonase Accumulation**—Nicole Benhamou*, Claude Lafitte, Jean-Paul Barthe, and Marie-Thérèse Esquerré-Tugayé

528 **Chemical Characterization of Stress-Induced Vascular Coating in Tomato**—Jane Robb*, Shin-Woo Lee, Royce Mohan, and Pappachan E. Kolattukudy

693 **Elicitor-Inducible 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase Activity Is Required for Sesquiterpene Accumulation in Tobacco Cell Suspension Cultures**—Joseph Chappell*, Carol VonLanken, and Urs Vögeli

739 **Accumulation of β-Fructosidase in the Cell Walls of Tomato Roots following Infection by a Fungal Wilt Pathogen**—Nicole Benhamou*, Jean Grenier, and Maarten J. Chrispeels

751 **Anthocyanidins and Flavonols, Major *nod* Gene Inducers from Seeds of a Black-Seeded Common Bean (*Phaseolus vulgaris* L.)**—Mariangela Hungria, Cecillia M. Joseph, and Donald A. Phillips*

759 ***Rhizobium nod* Gene Inducers Exuded Naturally from Roots of Common Bean (*Phaseolus vulgaris* L.)**—Mariangela Hungria, Cecillia M. Joseph, and Donald A. Phillips*

880 **Accumulation of Scoparone in Heat-Treated Lemon Fruit Inoculated with *Penicillium digitatum* Sacc.**—Jong Jin Kim, Shimshon Ben-Yehoshua*, Boris Shapiro, Yigal Henis, and Shmuel Carmeli

928 **Energy Status and Functioning of Phosphorus-Deficient Soybean Nodules**—Tong-Min Sa and Daniel W. Israel*

977 **Ectomycorrhizin Synthesis and Polypeptide Changes during the Early Stage of Eucalypt Mycorrhiza Development**—Jean-Louis Hilbert, Guy Costa, and Francis Martin*

1080 **Enzymatic Detoxification of HC-Toxin, the Host-Selective Cyclic Peptide from *Cochliobolus carbonum***—Robert B. Meeley and Jonathan D. Walton*

1174 **Localization of a Protease in Protoplast Preparations in Infected Cells of French Bean Nodules**—Dominique Pladys*, Liliana Dimitrijevic, and Jean Rigaud

1181 **Ethylene Biosynthesis-Inducing Endoxylanase Is Translocated through the Xylem of *Nicotiana tabacum* cv Xanthi Plants**—Bryan A. Bailey*, Rosannah Taylor, Jeffrey F. D. Dean, and James D. Anderson

1206 **Light Microscopy Study of Nodule Initiation in *Pisum sativum* L. cv Sparkle and in Its Low-Nodulating Mutant E2 (*sym* 5)**—Frédérique C. Guinel and Thomas A. LaRue*

1221 **Nitrate Inhibition of Nodulation Can Be Overcome by the Ethylene Inhibitor Aminoethoxyvinylglycine**—Francisco Ligero*, Juan M. Caba, Carmen Lluch, and José Olivares

1342 **Systemic Induction of Salicylic Acid Accumulation in Cucumber after Inoculation with *Pseudomonas syringae* pv *syringae***—Jack B. Rasmussen, Raymond Hammerschmidt*, and Michael N. Zook

1445 **Rapid Accumulation of Anionic Peroxidases and Phenolic Polymers in Soybean Cotyledon Tissues following Treatment with *Phytophthora megasperma* f. sp. *Glycinea* Wall Glucan**—Madge Y. Graham and Terrence L. Graham*

MEMBRANES AND BIOENERGETICS

99 **Oxidation of External NAD(P)H by Purified Mitochondria from Fresh and Aged Red Beetroots (*Beta vulgaris* L.)**—Kenneth M. Fredlund*, Allan G. Rasmusson, and Ian M. Møller

264 **Characterization of Tonoplast Polypeptides Isolated from Corn Seedling Roots**—Min Ni and Leonard Beevers*

273 **Diffusion and Electric Mobility of Ions within Isolated Cuticles of *Citrus aurantium*. Steady-State and Equilibrium Values**—Melvin T. Tyree*, Charles R. Wescott, and Christopher A. Tabor

330 **Photoacoustic Study of Changes in the Energy Storage of Photosystems I and II during State 1-State 2 Transitions**—Konka Veeranjaneyulu, Marc Charland, Denis Charlebois, and Roger M. Leblanc*

381 **Thylakoid Organization in the Chromophyte Alga *Ochromonas danica*. Isolation and Characterization of a New Pigment-Protein Complex**—Pamela B. Gibbs* and John Biggins

388 ***In Vivo* and *in Vitro* Protein Phosphorylation Studies on *Ochromonas danica*, an Alga with a Chlorophyll *a*/*c*/Fucoxanthin Binding Protein**—Pamela B. Gibbs and John Biggins

477 **Small Light-Harvesting Antenna Does Not Protect from Photoinhibition**—Esa Tyystjärvi*, Antti Koivuniemi, Reetta Kettunen, and Eva-Mari Aro

502 **Nonsedimentable Microvesicles from Senescing Bean Cotyledons Contain Gel Phase-Forming Phospholipid Degradation Products**—Kening Yao, Gopinadhan Paliyath, and John E. Thompson*

537 **Fe^{3+}-Chelate Reductase Activity of Plasma Membranes Isolated from Tomato (*Lycopersicon esculentum* Mill.) Roots. Comparison of Enzymes from Fe-Deficient and Fe-Sufficient Roots**—Marcia J. Holden, Douglas G. Luster*, Rufus L. Chaney, Thomas J. Buckhout, and Curtis Robinson

545 **Induction of Senescence-Like Deterioration of Micro-**

somal Membranes from Cauliflower by Free Radicals Generated during Gamma Irradiation—Richard Voisine, Louis-P. Vézina, and Claude Willemot*

598 **The K^+/Na^+ Selectivity of a Cation Channel in the Plasma Membrane of Root Cells Does Not Differ in Salt-Tolerant and Salt-Sensitive Wheat Species**—Daniel P. Schachtman*, Stephen D. Tyerman, and Bernard R. Terry

644 **Transport of Arginine and Aspartic Acid into Isolated Barley Mesophyll Vacuoles**—Enrico Martinoia*, Monika Thume, Esther Vogt, Doris Rentsch, and Karl-Josef Dietz

651 **Two Apoplastic α-Amylases Are Induced in Tobacco by Virus Infection**—Thierry Heitz, Pierrette Geoffroy, Bernard Fritig, and Michel Legrand*

1130 **Inward Rectifying K^+ Channels in the Plasma Membrane of *Arabidopsis thaliana***—Roberta Colombo* and Raffaella Cerana

1212 **Evidence for a Highly Specific K^+/H^+ Antiporter in Membrane Vesicles from Oil-Seed Rape Hypocotyls**—Sagi Cooper, Henri R. Lerner, and Leonora Reinhold*

1294 **Immunological Characterization of Two Dominant Tonoplast Polypeptides**—Marion Betz and Karl-Josef Dietz*

1317 **Partial Purification and Characterization of Three NAD(P)H Dehydrogenases from *Beta vulgaris* Mitochondria**—Michael H. Luethy*, Marianne K. Hayes, and Thomas E. Elthon

1527 **Electrogenic Transport Properties of Growing *Arabidopsis* Root Hairs. The Plasma Membrane Proton Pump and Potassium Channels**—Roger R. Lew

1535 **Calcium-Pumping ATPases in Vesicles from Carrot Cells. Stimulation by Calmodulin or Phosphatidylserine, and Formation of a 120 Kilodalton Phosphoenzyme**—Wen-Ling Hsieh, Wayne S. Pierce, and Heven Sze*

1545 **Alternative Respiration and Heat Evolution in Plants**—Arie Ordentlich, Rebecca A. Linzer, and Ilya Raskin*

1573 **Patch Clamping Protoplasts from Vascular Plants. Method for the Quick Isolation of Protoplasts Having a High Success Rate of Gigaseal Formation**—J. Theo M. Elzenga*, Christopher P. Keller, and Elizabeth Van Volkenburgh

NATURAL PRODUCTS

204 **Characterization and Comparison of Arcelin Seed Protein Variants from Common Bean**—Lynn M. Hartweck, Robert D. Vogelzang, and Thomas C. Osborn*

778 **Cadaverine, an Essential Diamine for the Normal Root Development of Germinating Soybean (*Glycine max*) Seeds**—Andrea Gamarnik and Rosalia B. Frydman*
